

Sensei Biotherapeutics to Participate in the 32nd Annual Oppenheimer Healthcare Conference

March 3, 2022

BOSTON, March 03, 2022 (GLOBE NEWSWIRE) -- Sensei Biotherapeutics, Inc. (NASDAQ: SNSE), an immunotherapy company focused on the discovery and development of next generation therapeutics for cancer, today announced that company management will participate in the [32nd Annual Oppenheimer Healthcare Conference](#), taking place virtually March 15-17, 2022.

John Celebi, MBA, president and chief executive officer of Sensei Biotherapeutics, and Erin Colgan, chief financial officer, will participate in a virtual presentation beginning at 10:40 am ET on Tuesday, March 15, 2022. A webcast of the presentation will be available on the [Events & Presentations](#) section of the Sensei website. A replay of the webcast will be on the website for approximately 90 days following the event.

About Sensei Biotherapeutics

Sensei Biotherapeutics is a biopharmaceutical company engaged in discovery, development, and delivery of next generation immunotherapies with an initial focus on treatments for cancer. Sensei has developed two unique approaches – its TMAb™ (Tumor Microenvironment Activated biologics) platform, comprising unique human monoclonal antibodies and alpaca derived nanobodies that are selectively active in the tumor microenvironment, and its ImmunoPhage™ platform that leverages bacteriophage to drive the generation of tumor antigen-specific immune responses. Using its TMAb platform, the company has developed SNS-101, an antibody-based therapeutic targeting an immune checkpoint gene that inhibits anti-tumor immune responses called V-domain Ig suppressor of T cell activation (VISTA). Using the ImmunoPhage platform, Sensei is developing a library of ImmunoPhage, called Phortress™, with multiple tumor-associated antigens to create a personalized, yet off-the-shelf cocktail approach for treating cancer patients. The platform is designed to enable efficient, scalable and cost-effective manufacturing to support all of Sensei's clinical programs. SNS-401-NG is an ImmunoPhage cocktail in preclinical development for the treatment of Merkel Cell Carcinoma.
